COLLECTIONS IN THE WEST.—The difficulty of making the collection of negotiable paper in the South and West has long been felt by Eastern bankers, as the standing and responsibility of Western bankers were not well known. In order to obviate this inconvenience, and to enable Eastern bankers as well as Western firms to place their collection paper in reliable hands, East and West, we have prepared and printed a "List of Private Bankers," with the name of the New York correspondent of each, so that the standing of country bankers could be readily ascertained by inquiries at New York. In addition to this copious and authentic list, which is contained in the Bankers' Almanac for 1865, the pages of the Bankers' Magazine and Bankers' Almanac contain the eards of bankers in the following places, with their New York references. With this information in their hands, bankers need not be at a loss to select reliable correspondents throughout the country.

The cards of bankers inserted in the advertisement sheet of this work will reach banks and bankers in every State, city, and town in the United States, and in the leading cities of Europe.

To Hon James Pollock
Director of the M. G. Mins
Sir,
Monder date of July 5 th 18 h 5; I received from your official notification of my appointment as an agent of the Treasury Department, to Inspect and Report upon the present condition of the Branch mints at Charlotte. h. C. and Dahlonega Ja, in conformity with the letter you to select a quitable person for this purpose, delphia on July 10th, proceeded to make the oracionations required, with as much desputed as practicable and returned to this place on Sept 9th, The two months thus spent for exceeded my original estendate of the requisite time, in Consequence of the hohen and imperfect Condition of Southern Rail Road, of their want of Connection in runing times and especiall of the difficult and tedins overland write to Dahlinega, a distance of 75 miles from the nearest point on a Rout Road In disposition arising from his months have el nithout repose, has prevented an earlier perentation of the result of my labors, The letter of the Department and your own express the following fromts as the object of my Drippin: Viz.

1. To examine and report upon the precise Condition of the public property at Charlotte and Dakling as, connected with the Branch mints at those places,

2. Le adopt such meuns for their protection and preservation as may be in my power,

3. To report my opinion as to the propriety
of putting those Branch muits into operation,
with the addition of particulars pertrement and
important to the Guestion,

4. To Confer with the Provisional governor of north Cardina and Georgia, in relation to lemporary or permanent appointments to these Branch Mints, if necessary, condition of the Branch muits in my befort, unicecumbered with details of their more precise condition, which are cubraced in the subjurned Schedul, a. The Buildings and machinary of foth mints are in as good a condition, as the closure during four years of nar would narrant us in afficiency, They received no positive detriment from troops or individuals during the Confederate sway, except si the abstraction of looks ours a little machinery, which last has been returned, and they have been rejuned to a very limited extent during their occurs puncy by our our troops, The main fulding at Charlotte is in good Condition, having her crected some recently that that at Catheneja, It was employed by the Confederate government for the storage of goods Let longing to their Do Colled havy Gard situated. in Charlotte. The extent of preservation, which this Branch received, is dire, I have reason to believe to the Care of Lor J. H. Sithon. The former apayer of the mint and recently re-appointed

I the same fosition. This Branch was not used during the war, either for minting or apaying, The main building at Dahlney a has servinely suffered in its wood work through the neglect of many years, The preservation of this Branch, is I believe, due to the residence He occupied a position in the mint and when its operations ceased upon the opening of hos titlities, he was permitted to remain their to apair gold for the people. As this operation was a been bot detrimental to the property, and was a been efit to those engaged in gold mining and washing, Genle Wilson permitter for Quillen to remain there under the same Circumstauces, On the Laure grounds I allowed his Continuance in the fullding, until Regulu officers should be appointed to assence the protection and preservation of the minh, The out buildings of both Branches are in a very dilapedated andition, and will need much upair or a total renewal, The repose of bright orin machinery and apparatus, during four years, without the constant and actively protecting hand of the work man hus neceparily generated more or leprust, but after Careful inspection, I believe it can he reachly removed and will not prove to have been Deriously detrimental to the futwo working of the machinery, Imale for hims of the ondchinery, some of the apparatus, and the greater part of the tool cuployed en the direct and nicedental operations of

minting will have to be renewed, as they have been termined or materially supered. I have endeavoured to approximate Correct es-truites on the following table, of cost ofrepain and renewal to the fulldings, apparties and

muchinery of the two Branch mints, reserving emponed Schedule, A, Correct estimates

cole only be made by the professional mechanice, after a careful survey. The Guestin spring ing out of the third fromt of enquiry, whether the Branches shall be continued as muits or

afrag Office, induced me to divide the es

thinate accordingly.

Estimated cast of Repairs	Charlotte	Cahlonega
For apaying purposes, exclusively	\$1540= 042070=	\$ 1910 = Wy 23 211
For apaying purposes, exclusively In Buildings	15110 = 22811 =	38-1111 = 35-111
Total for apay Offices,	\$ 30411 = \$4320 =	\$ 441111 = \$58 20=
Additional for refining & Corning Lotal for all minting purposes	11111 = 15-1111=	1000 = 1500
Total for all minting purposes	\$ 411411 = \$ 5-8 211=	\$ 5400 = \$73 211

I remark on the above that the estimates embrace only such repairs as I supposed necessary to put the Branches in present active operation. Ful that more extensive repairs will have to made, especially to the reallonega Brance, before they Com be considered in the best Condition 11 Protection and Freservation of Fablic Property

Offm my first reaching the Branch mint at Charlotte, I formed it in possepion of a detachment of M. G. Loops, who endently sufficted

no injury on the huilding or its contents. The apply department was then locked of and the Keys in Charge of der J. H. Sillow, by permission of Seul auger, commandant of h Carolina as der Geblon was then in the north and to remain for a few weeks, and as the Sustine times of the commandant over that the closed portion of the building should remain so, I Concluded to allow things to remain as they were, and proceed to the oracumation of Dahlonega, pending Der Schboris return, Mpm my visit & Charlotte a minth later & formi that ofther twops had replaced those I left heen forced open, the Bolances and other an ticles disaranged, and according to do Sillin some gold and silver had been alshacted The Officer in charge had seen toth the gold and Delver, and I trust that through The mirestigation of Lor Silber. A mile he found and returned, While ni Charlotte, I had the lather and pointing wells hoursferred from the confederate havy to the mint, from which they had been removed, The reappointment of der Gibbon, as apayer is property of this Brunch mile he druggend ed and preserved. I form that some of the apparations of the Dahlnega Branch had been some what origined, by the privilege accorded to the Print. to rove universted over the whole huilding except mi a few rooms, where the more del

reate apparatus was Rept, a Equad of 15 men under Level Zeinmerman of the 139th Ill. V.V.9 accompanies one to the mint, to replace the Canalry, and I aprigned certain portions of the building & their with strict injunctions which I am Confident were othered to cuter on other part of the fuilding. Upon my return to Dalton to give special instructions to Bt. Br Sent Releffner. of the 189 Ill. In wi relation to the mint. I formed that in the short interior Daholmega was alread, hour ferred to the juris diction of Seul Judah Dearing the consequences of such frequent Changes of miliatury occupation, I ment at auce to augusta to explain the state Ithings to Maj Gent Steedman. Coul of Georgia, and to request that the hoofs, should not be quartered in the building, because the personal Character and discipline of the officer in Command nas the only quarantee of the due preservation and Justection of the public property. I further states to him the disturbed Condition of Mpper Levrein and the necessit of a heavier force than fifteen mel. He at once pued instructions of Sent Judah to detach a force of forty (40) med duly Commanded, to Dahlinega, with special mistrue times with special mistrue times that the mist fuilding should not be occupied by the hoops. Except perhaps one or his rooms by the officers. In the means think his face il, and will I doubt not exercise the Same care of the fuilding and its contents, that he has heretofore dine, until officers are ap pointed and occupy their Posts, as apayer te. This arrangement altho not wholly sat insfactory, to one, appeared to be the best I Could make muder the circumstances, 111. Shall the Branch mints leagain put in operation? The auvents of gold formerly deposited in the Branch hunts: dued the wide distribution of gold Deposet and gold learing wells, in Virginia Name outena and Georgia, which have proved profitable to Capitalists and Ismalle of erature, and the large portion of grown yet Caprable of being worked, Deen home to harrans the aid of Government to succomage the developement of gold in those regions, by the establishmen of muits or afray offices. Extensine explorations have been, and expensive works erected some of them shortly previous to the war, and not get completed, to extract Jolic. Emay mention, among others, a single ditch with agreeducts, extending holde miles in lengt. and rulended or be carried two miles further, to convey nater to the gold Hills new Cahlinga, From What I could ascertain si my short tour. the largest portion of ground remains unworked in h. Carolina an Leongin, and mules the enchantment of distance draw Capital and later away from these regions to the far hest more activity may be auticipated in the gold from duction of the Southern States than hitherto hove over as the government already popeface walks cais rendered capable of giving the desired and to the prot

hie it appears to me that these cetablishments thould

he put again with active operation, The how existing ones are ample for all popille production. Shall these be Brauch muits a my appey Offices? If gold dust be deposited in the brink improved by melling, Opayed, Cuel out a han and its value stamp ed therein, its commercial bolive is at once the depositor or Holder, Hauch gald is to be comied at that mint, it much of necessity be previously refined, and hence all the appliances for refining and Cornage would be required me addition to those for apaying. These acts necessitate the cuplopment of more officers and of acids in glass repels into the Interior of the Country, the use of much more mochinery and appear alus, and great mereur the cast and complant of the mintover an opay office. The only advant age of coincipe in the Inheren would be the distri-Lution of a hurderate amount of gold in the directly will es alle forem of Corn, in the regions surrounding the Branch hunts, but this advantage is only livit ed to the short trine of transitt, of a gold hur of determined value. Is a place of Comage and it return The advantage offens to he to be too short in time to small in value, and too lunted as to the muche of depositors, to outneigh the increased cost and complenity of Refining and Corners at Beanch Brits with Interior of the Country, moreover even this sligh adraulage meg te met. If the Soverment should gui a specie droft for the value of the deposit, payable at any depository on a commercial centre, and should aprime the responsibility of hours porting such gold to a mint for referency and Comage.

I derned this excellent suggestion from you reput as derrecht of the mint for 186, land can add nothing more It it. I aim Confident that there would he no difficulty in negotiating the sale of a specie draft ne the Gouthern gold regions, Rubject to no other Jos then the rate of exchange, which would doubt less le semetimes in favor of the Lopositers Do the require any hew Branch mints in the Winter States? Inhile the question is now, for the first time since their Establisment, an open one, whether the two Branch mints on the South shall be reopened with full him ing power, or simply as apay offices, there is notherny in the way of examining the general hearongs of this question, with a view to future begand aslation by Congreso, the only interference is per Ochrado, but I believe that mi anse quence of the difficulties of transportation, it has only been worked thus for as an appeny Office, and has proved ample for all commercial purposed. Geld'and Silver are being extensively developed in Oregon, Idoho, herada, aryma and then Territories, It is hardly necessary to remark that in a gold producing region, a very small proportion of their gold is required by the pro ducing Communet for Circulation, and that nearly all of it must find its may to a commen crail centre, Thall the expensive and more com browsetweetine of a mint m'to buildings, how Chuiery and operations, be erected in each one of these Territories or States, or populy an mue than one beality in each of them, because of their great extent? This is not only important as an economical question, but another arises with it. Whether the multiplication of centre of comage, may not multiply the pepitility I errone ous forces of Com? Consider for a moment that the same value of gols, whether in apayed har, a vi referred Corir, will have to be hoursported to the Commercial Centre at an equal cost and eist to the public, I sween ment, nece to aprime the transportation of hew The well would no doubt he borne by pufects reliable Transportation Companies, for a moderate Consideration, more moderate than would he the case if effected for individuals. The Cost enight be paid by the Leposith mude the Charge for cominge, with or without are addit thought conseideration. If the gold is to be refun ed for Cominge at our interior Branch mint. all the materials for refining will have to be housputed to that Mint, from a Commercial and manufacturing Centre, and the Copositor by virtue of the proper Clause in the general hins law, requiring him to pay the cost of refining, will have to hear the expressed of hours purting the materials for refining, in addition to the usure Charges for Comage and transportation of Coin, It cutails vine cepary expense both on the Lovern ment and the Laprosition, For if gold is simply apayed at our Interior afear Office. its come mucial value is known, and it is view mediately Convertable with low by a specie For comment droft at an expense to the Leposita of the moderate, change for apaging, and the changes for transporting gold, - and at an expense to the Sovernment of maintaining an apay Office

and comed in the Interior, should be charged with the increased cost of reficiency, over that necessarily impaged on it is bealities most for and the production of the sould ask the noire ased out of production should ask the neire ased out of production, but as this is not the case in the present instance, it is at variance with the sundest economical principles to affect the reins which I have presented affect to me sufficiently to prove, that it is against the sinterest of the government, the Depositor, the kinner, and the general public to the Depositor, the kinner, and the general public to the Country, Sense that the sinterest in the Interior of the Country, Sense that the sinterest in the Interior of the Country, Sense that the sinterest in the Interior of the Country, Sense that the sinterest in the Interior of the Country, Sense that the sinterest in the Interior of the Country, Sense that their the Show that their the sinterest addressed go further to show that their the sinterest addressed go further to show that their their them.

should not be multiplied, ever in the com enerceal centres of the Republic, The suiple munfacturing fruitile ought to be sufficient, that the manufacturing oftentions of Refining and Orniage can be nost economically effect ed in the fenest bocalities. On the grounds I have presented. it appears to me that there should be but two muts no the huited States, one on the Eastern and trestern Coasts respectively, I am not proposed to advecate even on general grounds, the continuous of even the Branch punt at hew Orleans, for powerer useful it formerly has, as the neurest recipient of silver from our their chief secure Thereio, the sucreasing forduction of silver n' ou an Territories me probably divinish the activity and need of that Bruceh, henen the lep, it is in existence with all it applian ces, and m'an important Commercial on the, as well as to avoid the importation of a desire to deprine the Southern Ports of Coming Brueleges. I am willined to maire my of jections in relation bit, and to accord to it the power of Coming Delver, The current of god dust will partably not hereafter flow to bands hew Orleans, General plan for Cepay Offices Since the most favorable moment is present for a dopting a general system for apays Offices, because of the question in relation to the how Southern Branch mints, and because the legislation of the Congress will be asked for to estatish litte offices in hew Lerritories, and

States, I venture to suggest the outlines

of our operative Heur, which appears to me to combine the greatest earnowy with efficiency and a full system of Checks, The official staff might comprise two com missined Officers, One the Duperintendent and apayer the other the Treasurer and melter, Then might be a general muit Clerk, or one Duh or din ate to the Treasurer, and the apayer shing have a first clap workman to opsist him The operation force neight consist of two melters, two laborers, and a Watchinger. The whole force then would be, two officies, a clark The works for an apay office might te a plani and moderate suid buildly with the substantial coulds, fire and burglan proof, and planin sheds for the storage of firel to. a steam- engine to supply noter and for power, a grinding apparatu for sweep, two meltily furnaces, the full appliances of an appayer, several large and small balances, with the subsidiary much isin of a lathe. Dritty and Carpenter heuch seem to me, a constitute sufficient fennishing for all open prinfroses. The official aut operation force above suggested, and the building themselves to my judgment as consti-beting our apay Office, that will operate securely, economically and effectively. I submit the plan Is your better judyment,

I culled when Front you'r Holden in the enrich gester to the Department the name of a genaction on that faint, In a conversation with Road Ger Johnson, as I was not their acquain ted with individuals Capable of filling the offices. I preferred suggesting the principles which ought to govern nominations. On the supposition that the Branch huits might Le opiened with full mintien, powers, & suggested that the Supervitudent should proper a husiness capacity. That the apayer showed have some orequaintoured with Chemistry as well as he or become a skillful apayer and that the meller, refiner, and Cornier Thould be a toterably expert mechanician Knowledge, He informed me that he had In re-appointment. I do not doubt from all that I could learn, that the appointment would be a good one, Subsequently, as the propriet of specify the Branch huits only as apar offices fireed itself on my attention and satisfied my mind that their estatelishment as apay offices has the only proper Course for the government to presue. Surde A Gar Johnson, Knowing it to be you opinion also. It the effect. That in all probability the mint would only be made apay offices, and that m' such case neither Superintendent or Corner uneld be required. I merely suggested

to him that in this case . the Treasurer should have some Knowledge of metallurgy, altho of lepsinportaine than his Knowledge of his inep The President having seen fit to appoint Les Sibbon as apayer of the Office at Charlotte I did not deem it necessary to call again upon sor Holden, on my return to the horth may Ind suggest to you, in cucleding this he ad that sime appointment, if practicule, le quei to me Duiller, at Cohlinege, musmuch as the preservation of the hunt property at that place is mainly due to trice, Inchotless is the finis I received of their in Loahlonges, altho I confel, I have now Carried out the Instructions conveyed to me in the letter of the despartment, and en' your own, to the best of my ability and I hust to your satisfaction, I will only unge m' Conclusion, that I think it desirable for the government to determine as early as practicable, whether to conduct the tres Branch hunts as such or only as apay Offices, and to make their appointments of Officers, or as to se cure most effect inely the preservation of the Public Preperty and to enable the officers to must early preparation for a hinter's Compaign

Very Respectfull, yours (signed) gas. Co. Booth Copy!

More specific details in relation to the state of the Buildings, apparatus and Machinery, of the Branch Mints at Charlotte NC, and Dahlonega, Ja. The Charlotte. The original building, construct ed in 1836, was destroyed by fire, and replaced by the present structure, which may be stated in general terms, to be in good contition. It is a building of one story in height, with a basement rising some six feet above the ground, making airy cellars, and is constructed of brick, stuccoed. The Chimney stacks appear to need repainting. The cornigated roof of Kincked Iron needs a little repair, and thorough painting, to prevent rain leakage, which has slightly damaged the walls and ceiling of the interior of the building. I could learn of no one in Charlotte, aspable of repairing such a roof, altho' such a person might be found at the A.C. Company's shops. The frame out buildings, sheds for fuel and general storage, are in a dilapidated condition, requiring considerable repairs to fit them for present use, A single coal of paint

on the woodwork of the main building would be a great advantage for its preservation, altho'not presently essential. The steam engine was found to be in running couldtion. I had an experienced machinist to examine the boilers, which he pronounced to be in fair condition reginning an outlay of about \$200 = to non them safely. Calking and paint will probably be sufficient for the Water Janks. The chasers and lathes can be rendered effective by an outlay of \$300 - (a 400. The melling furnaces, belting and forge, will have to be renewed. Fivo Iron safes, lost during the war, should be resupplied. Sire-brick, melting pots, and the various tools for melting, for the forge and for carpentry, will have to be almost wholly, resupplied at a cost of some \$ 500 - to \$ 650. The company's shops, of the A. C. R. R, Co, near Greensboro, appear to be the nearest available point, from which some of the tools can be obtained. The finer tosts, should be purchased in The North, and it would be perhaps better to send a single set of melting tools from the Philada, mint, as fratterns.

2nd Dahlonega The main building of this Branch Mint was originally well constructed, of two stories height

with a basement rising about four feet above the ground in front, and still higher in the rear. The basement is solidly built of rough hewn granite blocks, and cut-granite constitutes the sill lintels and fambs of windows and doors. The rest of the buildings is com posed of brick, stuccoed. The mason work is generally good, needing few sepairs, excepting the chimney stacks which pass through the wood work of the loft, and The shingle roof with the very censurable thickness If half a brick, rendering fire imminent at any moment. I found the wooden mantel in one apartment burned from a crack in the thin flue. All, or at least several of these stacks should be rebuilt, The wood work of the whole building has suffered severely, and is decaying in parts, for lack of paint, which has evidently not been applied to it for many years. Some of the frame outbuildings are very much dilapidated, and need either renewal, or considerable repairs. The greater part of the machinery, like that at Charlotte, has suffered rather

from the rust of inattention, than from injury The

testimony of several who were engaged in the mint.

prior to the war, is, that the boilers were then unsafe, In the obsence of means or ability on my part to test this, question, I prefer adopting the opinion, and recommend the purchase of new poilers. most of the tools for the turning lathe, were removed to Alauta during the war, and are doubtless among its debris. A toterably full supply of tools for melting, for lathe, forge and Carpentry is demanded by this Branch Mint, because of its isolated and distant position from centres of mechanical industry. I examined the Government works at Chattanooga, and the private establish ments at Macon, with a view to the purchase of new boilers, and recommend the latter, as I learn that the former are to pass our of the hands of the Government,

The furnaces are in toterable condition, touly need relining. The water tanks, grinding apparatus belting, black lead pots, and fire brick, need similar renewal or repairs to those at Charlotte, except in the case of sand-pots or Hefsian Crucibles, of which there is a liberal supply at Dahlonega. The two how safes, are in good condition.

In regard to both Branch Mints, it is a question whether the old locks on the vaults, should not be replaced

Schedule A. (Copy)

by the more modern mutation locks and keys. With well constructed vaults, fire and burglar proof, which I would unqualifiedly recommend for new establishments, there would be no need of small iron rafes.

The table on the following page embraces my more detailed estimate of the cost of renewal and repairs to the two Branch mints to fit them for present use, Both need, and especially the mint at Dahlonega, more extensive and costly repairs to render them more permanently useful. I have abundant reason to distrust the exactness of my estimates, and I only offer them as opproximately correct, as far as my knowledge would permit. I have given the estimated repairs to, for coinage ofter the others pending the question of the operation of the Branches as mints or assay offices.

It is proper that I should state my opinion, that both Branches might be opened, as Assay offices, within a few months, with fewer repairs than I have estimated in this Schedull, and of course at so much less expenditure.

I have respectfully to request that, as soon as practicable after the 30th day of September next, you will transmit to this Office a List of the Officers and Agents employed in your Office on that day, stating where each Officer or Agent was employed; the State or Country in which he was born; the State or Territory from which appointed; and the amount of compensation allowed to each. The compensation must include the full amount received by each Officer or Agent per annum, whether from salary, fees, or commissions.

This information is required for the Biennial Register, in compliance with Resolutions of Congress of April 27, 1816, and July 14, 1832, and Act of March 3, 1851. As the printing must be completed before the 1st of January, it is desirable that the information requested should be forwarded as early in October as it can be compiled.

Very respectfully,

Mullenn). Afri Register

United States Issay Office Leo. F. Summing Esq. be very glod to being which studentendentente Cortain when all shock in the fixed read Redenant have all the I wednesd all to you have Called might attention to a letter of the Director of the brent received by you today, it will not be deemed mappeopriate to endeavor to bemore Some modapprehension of medindenstanding that seems to exist. In the early part of this month, as large a quantity of kelver at posseble was sent to the ment, because of an unusual and dudden demand for Relier Com at this office. The Treaturer of the ment was notefied that in a short time we would dend fine selver to make the average finewess up to or above standard this has been done - that explains, as I hope, Latesfactorily the main Subject (terrice unged whow the Directors attention) that you are directed to semedy I many him it he was as to the request that when I bake metal" is transmitted to the musto sto peculial Character and origin Should be expressly stated so day leave to day that that the Witerally and fully done in the Emerice Went to the maderier

of the mint . How the other officers have overlooked the fact I know not -

as to the one or more deposits" that have "rendered a very troublesome and Costly procep of refining necessary of should be very glad to know which they were, and would Certainly retain all such in the future for treatment here - all the deposits were numbered; - what were the numbers of the quelty ones! We refine deposits of a Limitar Char acter Continually without any additional expense, except in to far as the base metal requires and brocked proportion of nitric acid to hold it in Solution than if it were Delver; but the tariff of Charges established by the Director of the ment provides for all necessary charges, and Such have been allowed the mint by this office, as you will notice by a reference to the Luvvice.

to be further informed - Allusion is made to some deposits "which as they Contained gold, were necessarily used to granulate with our deposits" no gold was charged in the Gurine, mor has the mint given this office credit for any in account - as the greatest Case has been exercised to retain for our own parting operations all deposits Containing gold in too small quantities to be reported, in order that it might not be practically lost in forming a part of the allog in our

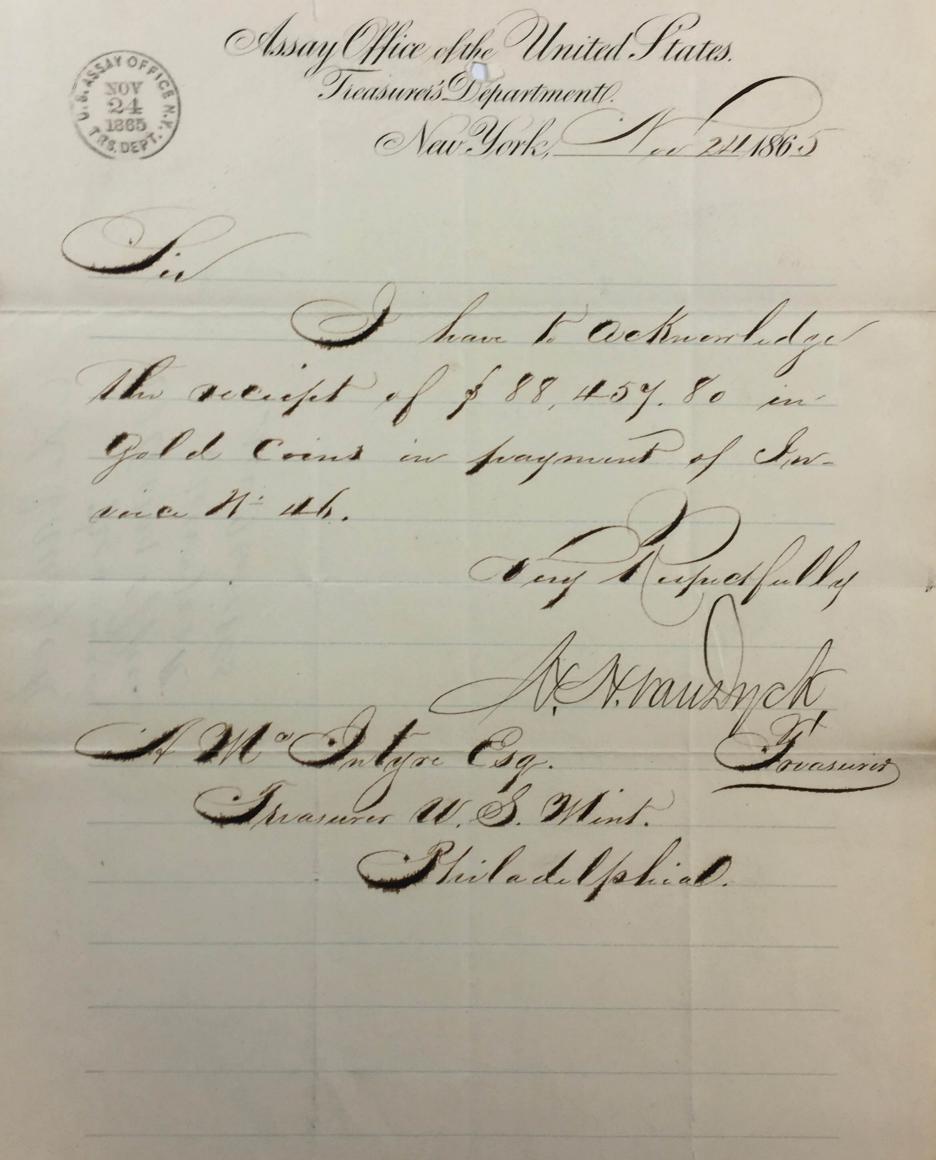

United States Assay Office New York Oct. 27, 1865. Dear Su, I duly received your letter of the 28° met., enclosing Copies of love letters addused to you by Inf. Booth, the Mellin & Refine of the Mint, m reference to base selver received from this Office. I fully appreciate the importance of quarding against Such occurrance, and this you Meller & Reform will have no further ground of complaint. It is one to Mr. Mason that I submit for your Consideration The Endoud letter which he has addressed to me mide date of the 24th met. Mery infectfully, your obt. Level, Itm. James Polloch & Gev. 7. Denning, Director of the Mint. & Supt.

From Geo. F. Dunning Esq.

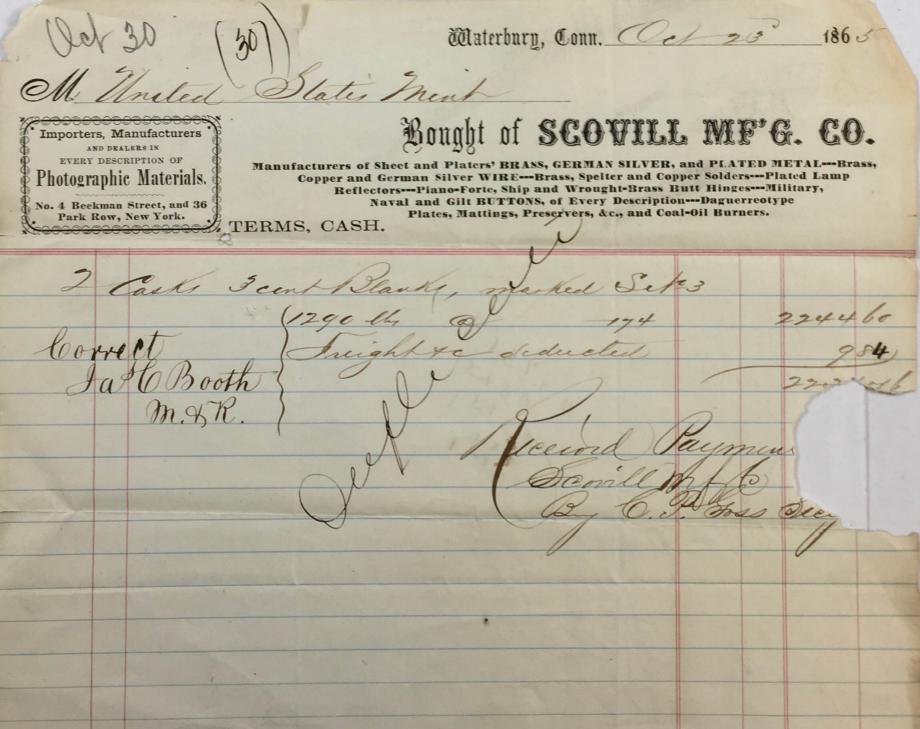

Supt. assay office

New Bork. Enclosing letter from mr. mason Melter and Referer, on base silver rece from n. B. Office Oct. 31. 1165

Lilver Coin I am itterly at a lop to account for its in the definits presence, when operated on at the mint - may it not be popeble that done "brittling" metals Containing gold have been accidentally mixed with the deposits we sent, after they reached the ment! On this whole Subject allow me to Day farther that our reason for not refining all the Silver deposits is not that we experience any difficulty in refining any; but that we have thought the Copper allog therein to be of considerable value to the mint, as Copper Constitutes one tenth of the weight of the Silver Coins which we receive for our depositors in return for the Selver forwarded -I need hardly day in addition that I shall always be ready to obey promptly any notherctions received from the Derector of the mint, and glad to respond to any Requests from any of its officers Buy Respectfully Your obt Lot Audio madon metter thefines

Gour letter of the 18th inst inquiring the mint value of gold corn issued prior to 1820-25., as compared with the value of the present issue, has been received.

The Gold Eagle of \$10. puce issued prior to the Act of Congress of 1834 is worth. \$10.67, as compared with the issue of the same coin since that Act:; and all the gold coins of the United States of a lesser denomination, prior to 1834; have a proportionate intrinsic value.

The value now stands (taking the Eagle as the Example) As follows,

Eagle prior to 1834 — \$ 10.67.

" Since " - \$ 10.00.

Tery Respectfully.

(Ligned) James Polleck

No AMERICAN TELEGRAPH COMPANY.
TERMS AND CONDITIONS ON WHICH THIS AND ALL MESSAGES ARE RECEIVED BY THIS COMPANY FOR TRANSMISSION.
In order to guard against and correct as much as possible some of the errors arising from atmospheric and other causes appertaining to telegraphy, every important message should be REPEATED by being sent back from the station at which it is to be received to the station from which it is originally sent. Half the usual price will be charged for
repeating the message, and while this Company in good faith will endeavor to send messages correctly and promptly, it will not be responsible for errors or delays in the transmission or delivery, nor for the non-delivery of REPEATED MESSAGES, beyond TWO HUNDRED times the sum paid for sending the message, unless a special agreement for insu-
rance be made in writing, and the amount of risk specified on this agreement, and paid for at the time of sending the message. Nor will the Company be responsible for any error or delay in the transmission or delivery, or for the non-delivery of ANY UNREPEATED MESSAGE, beyond the amount paid for sending the same, unless in like manner specially
insured, and amount of risk stated hereon, and paid for at the time. No liability is assumed for errors in cipher or obscure messages; nor is any liability assumed by this Company for any error or neglect by any other Company over whose lines this message may be sent to reach its destination; and this Company is hereby made the agent of the sender
of this message to forward it over the lines extending beyond those of this Company. No agent or employee is allowed to vary these terms, or make any other or verbal agreement nor any promise as to the time of performance, and no one but a Superintendent is authorized to make a special agreement for insurance. These terms apply through the whole course of this message on all lines by which it may be transmitted.

FORM NO. 64.

This Receipt, properly filled up by the Shipper, must accompany the Freight.

PENNSYLVANIA RAIL ROAD COMPANY'S

FREIGHT STATION.

Corner of Thirteenth and Market Streets.

Goods shipped by this Company, to be forwarded to points beyond Pittsburg, will please address the Consignee at Pittsburg, instead of Shippers at Philadelphia.

CONDITIONS

Freight offered for Transportation must be in good order, properly packed, and distinctly marked, otherwise the Company will not be responsible for loss of Goods or wrong delivery.

When goods for more than one mark are comprised in one dray-load, separate receipts must be sent for each.

OFFreight carried by this Company must be removed from the Station at Pittsburg during buisness hours on the day of its arrival, or it will be stored at owner's risk and expense, and in the event of its destruction or damage frem any cause while in the depot of the Company, it is agreed that said Company shall not be liable to pay any damages therefor.

It is agreed, and is part of the consideration of this contract, that the Company will not be responsible for leakage of Liquids, breakage of Glass or Queensware, the injury or breakage of looking-classes, glass show-cases, picture-frames, stoves, castings or hollow-ware; nor for injury to the hidden contents of packages; nor for the loss in weight or otherwise of grain and carising to any articles carried, from the dects of heat or cold; nor for the loss of nuts in bags; or of lemons or oranges in boxes, unless covered by canvass; or loss of humage to Goods occasioned by Providential causes, or by Fire from any cause whatere, while in transit or at Stations, in consideration of the Company insuring the Goods safet to Ditsburg, against all hazard, by instructions of owner or shipper before shipping.

Freight to be paid upon the weight of Goods, as assertined by the Company's scales at CFThe Company not responsibile for accidents or below the form unavoidable causes. The responsibility of this Company as a common carrier, under this recipt, to commence upon the removal of the Goods from the Depot at Philadelphia in the free of the Company, and to treight per 100 pounds, when forwarded through by Rail Road, beyond Pittsburg, must be clearly and plainly marked on the packages, "Through by Rail Road,"

N. B.—Shippers are requested to send written instructions when it is intended that the Company shall insure the Goods safe to Pittsburg.

Through and Local Freight will not be received after 6 o'clock P.M. Local Freight must have the name of the Station at which it is to be delivered plainly marked on the packages, and on this receipt.

@Gunpowder and Friction Matches not carried.

Which it is my	strolly acroed is to be forwarded to our Agency nearest or most convenient to destination only, and there delivered to other parties to complete the

Which it is mutually agreed is to be forwarded to our Agency nearest or most convenient to destination only, and there delivered to other parties to complete the transportation.

It is part of the consideration of this contract, and it is agreed, that the said Express Company ARE FORWARDERS ONLY, and are not to be held liable or responsible for any loss or damage to said property while being conveyed by the CARRIERS to whom the same may be by said Express Company entrusted, or arising from the dangers of Railroads, Ocean or River Navigation, Steam, Fire in Stores, Depots, or in Transit, Leakage, Breakage, or from any cause whatever, unless, in every case, the same be proved to have occurred from the fraud or gross negligence of said Express Company, or their servants; nor in any event shall the holder hereof demand beyond the same of FIFTY DOLLARS, at which the article forwarded is hereby valued, unless otherwise herein expressed, or unless specially insured by them, and so specified in this receipt, which insurance shall constitute the limit of the liability of the Adams Express Company. And if the same is entrusted or delivered to any other Express Company or Agend, (which said Adams Express Company are hereby authorized to do.) such Company or person so selected shall be regarded exclusively as the agent of the shipper or owner, and, as such, alone liable, and the Adams Express Company shall not be, in any event, responsible for the negligence or non-performance of any such Company or person; nor in any event shall said Express Company be liable for any loss or damage, unless the claim therefor shall be presented to them, in writing, at this office, within thirty days after the Shipper's risk only and the Shipper agrees that the Company shall not be held responsible for any injury by breakage or otherwise, nor for damage to goods not properly packed and secured for transportation. It is further agreed that said Company shall not in any event, be liable for any loss, damage or detention caused by the acts of God, Civil or Military Authority, or by Rebellion, Piracy, Insurrection, or Riot, or the dangers incident to a time of war.

For the Company,

Washington, March 14, 1866

To the Hon. Hugh McCullock, Gerretary of the Treasury.

Dear Fir:

As I had the honor to speak to you about engraving in this Country original dies and hubs for chilian coins, you were kind enough to give me a recommendation for the Mint in Philadelphia to see what facilities. I could find there for the working of them.

Through your introduction, I saw the engraver, Mr. James B. Longacre, and he was willing to do the business, but he will not enter with me into any engagement of the kind unless he obtain the approval of the Georetary of the Treasury.

With that object, I take the liberty to apply to you, soliciting from your kindness,

were it not uneppedient, to permit Mr. Longacre to undertake that work for the Chilian Government, outside of his official duties, and to use for it the materials and machinery of the Mint, under the supervision of the Director of the establishment; desiring this in order to ensure the proper quarantee of security and perfection of the work? Hoping you will think Tam not intruding, Thave the honor to be, Your most Obedient Gervant. Al Asta Burragas

Bejly, US Mint Opil 6 # 1866, Elloch How Hugh McGullock, Leay of the Treasury, Lin, The letter of the Chilian Charge de affairs in relation to the propriety of preparing original hubs and elies for the comage of that your, en the Ment of the United States, or althorizing our Engruser to do so outside of his official duties, has been received, It would not be expodient to authorize ouvergraver to do this work, but on consultation with him, we would be able to outeristend its execution by autists outside, and thus secure for that comage the full benefits of the skill and expenies of this Institution, mortagues of this City, an artist of high order, and for many years in the Engrasers Der of this mint, will no houbt undertake this work, and exexito it well, and under the chine of supervision of myself and the Engraver it cannot fail to give rotes faction to the fort of Chily fame Block Due eter

Lecty. Treasury In anower to letter of Chilian Charge de affairs in relation to preparing hubo and dies at the U.S. Mint for that Lout. April 6. 1166

James & Bryann Heartfird Regrestioner Jodian Mark 30 1863 trupted until another his wild be mide or another Mint of the United States, Philada Jan. 6. 1866 Dear Sir all Appoint was a blood trille all By an accident, to which the processes of art in my partment are leable, and which it is impossible human foresight to prevent; I have been put back in my effort to finish the die for the reverse of the bouble-Eagle bearing the new motto; on which I have been for some time engaged. This circumstance is mortifying to me as I had desee and fully expected at this time to have it complete; and have omitted no labour or care for this object. The accident to which I refer, occurred in the hands of my foreman; (a careful man to whom this part of the work is specially assigned) in attempting to harden the steel hub; which was to impress the working dies; the steel in which no defect was apparent, was split in the process; a casualty such as I have not met with in many years before. To do justice to myself, and to ensure the regularity of the working dies, I ought to have time to make another hub. The die I have finished, and from which specimens have been struck, may be used for the immediate demy to of the comage; but in case of any accident to die in the coining press, the work would be in-

26.8 Minh Febr 14th 1866 Cofy, By a usage of many years standing, what of the affinitions for Ordinary Expenses of the Branch minh is placed with the Freasurer of this mint, to meet war anto drawen by the Director for purchases made by him on account of the Branches, An account of these moneys is sendered by the Treasure & your office, I also receive ofter the annual afai in each year, the proceeds from the Pag boins at the Br minto, (as present only from San Francised) which I disbure for ordinary expenses of the Branch, and render an account to the Super The apay boins properly belong to the gold coinage account, but are replaced to that account from the Ordinary Gund, at to Br mint, so that their use for ordinary of fenses here does not diminish the Counage Fund, It has occurred to me that this conflication of accounts is unnecessary, and that the letter flan is for me to fall over to the

Treasurer of the Minh, for the Branch mins account, all moneys record after the annual afay, Before pursuing this course touever, deem it profes to inquire whether you percuie any objections to it, I would also mention that it has ken my culin to exchange the coin record by me, for notes, with the afth Treasuren thus giving & the furt the benefit of the faire It seems proper however, that the ordinary fund of the Br Mits should have the herefin of the premum on any gile belinging to that I propose to seep such corn and or des the Branch mins with the gain wer the far wolve, vez haspelfully Jar. Pollock IS Smith sky Le Sur et a Sur de Sur 1 Mashington)

Den Ino A Rassino. can so to be prepared by die Dubors, Of amos a soph to your engues in regard to the relation being to of Franks a land to the relation being to of Franks (to the relation. Com, a Esport o in the terms of each Mulin the. The diameters of the French coins are fixed by an ond ordinance of 1830. In gold, the piece of 100 francs measures 34 millimetres, equal to 1.339 inches; 20 francs, 21 millimetres, or 0.827 inch. In silver, the 5 franc piece, 38 ms, or 1.496 inches; the 2 franc, 28 ms, or 1.102 inches. The pieces of any one denomination, laid in a row, do not make an even metre. In this respect, some of our coins are better arranged. Thus, Ho hatf 8 silver dollars, or 10 half-dollars, or 20 half-dimes, will measure a foot. Our whole series, however is adjusted to the inch & its decimal fractions. The size has never been a matter of legislation, but was fixed by the Director of the Mint about 30 years ago, and has not been changed, except in the gold dollar. Tractically, the mench law is not adhered to. Coins of earlier and later dates do not agree, because a lettering was introduced on the edges of some of them, which slightly spreads out the diameter measure, when any number are laid in a line. As they are never used for linear measurement, it is considered of no importance.

In regard to the weight of French coins, they are so adjusted by law, that 155 pieces of 20 francs (gold) are coined from a kilogramme (15,434 grains) of standard fineness, 900; and 200 pieces of 5 francs (silver) are coined from a kilogramme of the same fineness; other sizes in proportion. These terms answer to 99 155 troy grains for the 20 franc, and 385 17 grains for the 5 franc. If a suggestion may be allowed, on the general subject, it may be observed, that I'm any attempt to harmonize the money-units of the chief commercial countries, it will probably devolve upon us to yield the point of difference; and in a time of suspension of Specie payments, we may be in the best condition to do it. Mow it is a curious fact, that a gold coin of 250 prot quite two cents, grains, goo fine, will be one-half grain, below the pound sterling, and one half grain above a coin of 25 francs. (Not precisely, but very nearly.) This seems to be the nearest station at which we can alight. If it he asked to express the meight in grammes rather than grains, then 8.1 grammes mould be almost exact; and 10 eagles, or 100 dollars, would be an even number of grammes, 162. Then, for all ordinary purposes, it moved be known every where, that a five-dollar piece,

But to reach this, we must reduce our half eagle from 129 to 125 grains; a depreciation of 15'z cents, or about 3 per cent. This would, however, he not half so much as the Depreciation of 1834, and it would be very much less than recent experiences have made us familiar with.

It is two, all this would come short of effecting such a parity as would satisfy the niceties of mint operations, or of commercial exchange. But this can never be attained. To name only some of the obstacles: first, the mints vary in their norking. The Brench gold coin does not come up to the alleged fineness, nor did the British, until about 1852. The Sardinian francs (or line) were a little lower still; and the Belgian, in 1835, fell short 5 thousand ths. We cannot take any of those coins; French, Sar= dinian, or Belgian, at our mint, as goo fine. again, the mint prices haid for gold, differs from the mint rates of coinage; and thereby, the French Mint derives a toll of about 's of one per cent, while here it is & per cent, besides to per Cent for revenue tax. So that a French hoker mould not take our half eagle mithout a discount.

Hon. John a. Karron Washington D6 In answer to his inquires in regard to the relative might of French and american Coins, a Spressed in the terms of Each nation FEby. 23, 1866

Mint of the Anited States.

Philadelphia Tebruary 13th 1866.

The Committee on weighing respectfully reports; that they attended to the duty assigned them and ascertained the weight of the gold and silver coins of the year 1865, reserved pto the mint for that fune pose, and also those of the Branch him to San Francisco. The Committee beg leave to refer to the amend tables for the names of the coins, their legal weight, actual weight, and devication from the legal weight. An inspection of these will show, that the deviation from the legal weight is less than the amount allowed by law. The committee also compared the weights used in the ordinary business of the mint with the standard found troy, left and quarded with care, for that perspose, and found them to entirely agree. They also of anima the standard belance and found it to be perfectly accurate. On conclusion the committee take the liberty to state; that they found every thing submitted to there, not only fully coming who to all the requirements of law but exhibiting a care and according, on the frast of all commede with, the operations of the mento, which are worthy of the highest commendation. IN THE SENATE OF THE UNITED STATES.

APRIL 16, 1866.

Mr. Ramsev asked, and by unanimous consent obtained, leave to bring in the following bill; which was read twice, referred to the Committee on Finance, and ordered to be printed.

A BILL

To establish additional offices for the assay of gold and silver, and for other purposes.

- 1 Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is hereby authorized and required to establish assay offices of the United States for the receipt, and for the melting, assaying, and stamping of gold such points in the states of nevada and silver, at Aubrey an Oregon and minnesota and in the Territories Contana as he may deem expedient, whenever ovidences is presented to interest in such States of Territories or in any of them, are sufficiently State of Minnesota; and that the sum of six hundred 11 thousand dollars be appropriated for carrying the provisions 12 of this section into effect. 13
 - 1 SEC. 2. And be it further enacted, That for each of each of edeveloped to require the establishment of such assay)
 Offices;

- said assay offices there shall be appointed as soon as the 2
- public interest shall require their service, upon the nomina-3
- tion of the President, by and with the advice and consent of who shall also perform the duties of Treasurer and 4

the Senate, one superintendent, one assayer, and one melter; who shall also perform the duties of melter; 5

and the said superintendent shall employ as and the said Assayer shall employ such assistants subordinate workmen, and laborers, under the direction of the 6

as in the Judgement of the

- Secretary of the Treasury, as may be required. The salaries and assistants
- of the said officers and clerks shall be fixed by the Secretary 9
- of the Treasury upon the recommendation of the director of the 10
- mint; and to the subordinate workmen and laborers such 11
- 12 wages shall be paid as may be determined by the superinten-
- dent of the mint, and approved by the Secretary of the 13
- 14 Treasury.
 - SEC. 3. And be it further enacted, That the officers and 1
 - clerks to be appointed under this act before entering upon 2
 - 3 the execution of their offices, shall take an oath or affirma-
 - tion before some judge of the United States, or of the supreme 4
- court of a Territory, faithfully and dilicently to perform the
- 6 duties of their offices, and shall each become bound to the
- 7 United States of America, with one or more sureties to the
- satisfaction of the director of the mint or the Secretary of
- the Treasury, with the condition of the faithful performance 9
- of the duties of their offices. 10
- Sec. 4. And be it further enacted, That the business of 1
- said offices shall be under the general control and direction of

- 3 the director of the mint at Philadelphia, subject to the appro-
- 4 bation of the Secretary of the Treasury; and for that pur
- 5 pose it shall be the duty of the said director to prescribe such
- 6 regulations, and to require such returns, and to establish such
- 7 charges for melting, assaying, and stamping, as shall appear
- 8 to him to be necessary for the purpose of carrying into effect
- 9 the intention of this act in establishing said offices.
- 1 Sec. 5. And be it further enacted, That said assay offices
- 2 shall be places of deposit for such public moneys as the Sec-
- 3 retary of the Treasury may direct. And the superintendent
- 4 of an assay office who shall perform the duties of treasu-
- 5 rer thereof, shall have the custody of such moneys, and also
- 6 perform the duties of assistant treasurer; and for that pur-
- 7 pose shall be subject to all the provisions contained in an act
- 8 entitled "An act to provide for the better organization of the
- 9 treasury, and for the collection, safe-keeping, transfer, and
- 10 disbursement of the public revenue," approved August sixth,
- 11 eighteen hundred and forty-six, which relates to the treasury
- 12 of the branch mint at New Orleans.
 - 1 Sec. 6. And be it further enacted, That the owner or
 - 2 owners of any gold or silver bullion, in dust or otherwise, or
 - 3 of any foreign coin, shall be entitled to deposit the same in
 - 4 any of said offices; and the superintendent thereof shall give
 - 5 a receipt stating the weight and description thereof, in the
 - 6 manner and under such regulations as are or may be provided

- in like cases of deposits at the mint of the United States with the treasurer thereof. And such bullion or foreign coin shall, 8 without delay, be melted, assayed, and cast into bars or in-9 gots; and a stamp shall be put upon each, of such form and 10 11 device as shall be prescribed by the Secretary of the Treasury, accurately designating its weight and fineness; and in this 12 13 form the bullion shall be returned to the depositor, upon paythe established charges of 14 ment by him of two per centum of its set value stamping, or in lieu thereof, as 15 may be authorized under the direction of 16 prescribed by him to issue a certificate 18 19 the same metal as that deposited 20 as that deposited at the mint in Philadelphia or at 21 mint of the United States at San Francisco, and shall be 22 receivable in payment of all debts due to the United States. Sec. 7. And be it further enacted, That all the laws and 1 parts of laws now in force for the regulation of the mint of 2 3 the United States and its branches, and for the government of the officers and persons employed therein, and for the punish-4 5 ment of all offences connected therewith, shall be in full force 6 in relation to the assay offices by this act established, as far
- the following places to wit; the Gonled States mint at Philadelphia, the United States Branch-mint at Sinfrancisco, in the United States Branch- assay Office at New York

as the same may be applicable thereto.

Liuton township Tucob Scherrer to Coshocton Co. This on the 15th of April 1866, the Flonorable Firestors of the United states-Mint-office, Dear Vir, Excuse the liberty I hereby take to adress to you the following lines with the intention to direct for a few minutes your attention to the nineral I send to you in this letter. It is this the second time I take this liberty. The first time I sent you stuff which already had been in fire and you were then so kind as to let me know that you could not make enny further excumination of the univeral because it already had passed a fire provess.

This time now, according to your advice I send you mineral just taken out of the ground and observed a little from the young. Dear Jir, please favorably accept this my second lette, please subject this mineral to any necessary examination, and please at last let me know as soon as possible the result of your operation. If ever the wineral should be found valuable and worthy to be worked I would be much abliged to you if you would henelly let me know it by a few luies; but if the stuff should be found good for nothing, then I would like to close my letter with the sutisfaction that I have done my duty and with the humble remark that you have

abliged me by your benevolence consist a few lines ey a Under all circumstances Tremain respectfully yours Towal Scherre My adress: T. Scherrer Ecest Plainfield Cosherton Co.

Mint of the Anited States.

Philadelphia April 30 4 1864 Hon. John a. Rasson Chr.

Gour letter of the 27 th unst. received this morning. I also received a few days ago, your letter in relation to Dr. Barclay &c. I have been engaged in preparing a reply and hope to send it to you in the course of two or three days at faithest. The plan of Ar. Barclay is not a novelty in this Institution, and among the office's here who are familiar with it, it has no advocates. I will forward a full reply at the earliest

What is the prospect for the passage by the Genate of the "fire cent bill"!

I am yours

Wery truly Sattlevel Anister
